

### LASER ENERGETIC DETOXIFICATION

This natural modality combines homeopathy with a cold laser to assist individuals in eliminating the various toxins that we all accumulate in our bodies.

A homeopathic, multi-chord nosode of the identified toxins is imprinted on the day of your evaluation appointment. These homeopathic remedies are placed in a small glass vial and a very powerful Infrared light is pulsed through the homeopathic vials into the areas where the toxin has accumulated to drive the energy of the homeopathic remedy into that area, causing the chemical or toxic metal to begin releasing.

### PHOTOBIMODULATION

BIOFLEX® Technology uses super luminous and laser diodes to treat diseased or traumatized tissue with photons. These particles of energy are selectively absorbed by the cell membrane and intracellular molecules, initiating a cascade of complex physiological reactions, leading to the restoration of normal cell structure and function.

### LASER PROBES

This instrument effectively targets superficial nociceptors, reducing the sensation of pain and increasing arterial perfusion. The red laser probe has many additional therapeutic benefits.

### LYMPHATOUCH® APC

LymphaTouch is a myofascial decompression therapy device precisely controlling negative pressure to increase lymphatic drainage, break down scar restrictions and release tight fascia. It has a computerized pulsation and pressure control with high frequency mechanical vibration that is used to do manual lymph drainage methods. In chronic illness Lymph stagnation makes people feel ill. Once vigorous lymph movement is restored patients report feeling MUCH better!

### BCX WAVE FORM

Unlike PEMF, BCX uses much higher Hertz frequencies to target specific things in the body. This natural modality involves using gas tubes, conductive foot plates, and a variety of frequency delivery wave forms like sine, square, and sawtooth hertz frequencies to help with a variety of ailments. Most sessions are about 45 minutes and are done simultaneously with Wave Therapy.

### COMRA

Coherence achieved through modulation of different radiances. Combines radiant properties Laser, color light, magnetism and ultrasound. ComRa technology originated in the Soviet Union many decades ago and can best be described as a non-needle, non-invasive powerful form of meridian based healing. Like acupuncture on steroid so to speak. ComRa is usually done in combination with Wave therapy and PEMF.

### SALT CHAMBER

A device called a halogenerator grinds salt into microscopic particles and releases them into the air of the room. Once inhaled, these salt particles absorb irritants, including allergens and toxins, from the respiratory system. This process breaks up mucus and reduces inflammation, resulting in clear airways. The salt particles have a similar effect on your skin by absorbing bacteria and other impurities responsible for many skin conditions.

## Do you want to live free from incapacity, limitations, and diseases that so frequently affects the quality of life?

*Joint pains, neuropathy, rheumatoid arthritis, plantar fasciitis, diabetes, high blood pressure & etc.*

## Do you need expedited healing for your mobility and injury recovery?

*Surgery, fractures, sprains, joint pains, frozen shoulder & etc.*

# Wellness By Healing is the perfect place to achieve this

## HEALTH AILMENTS

Dr. Miller can concisely and successfully gather objective data of any individual's health challenges. By using state of the art non-invasive means through a Zyto bio-impedance cradle and proprietary breakthrough Asyra & Zyto software, Dr. Miller can instantaneously obtain a thorough summary of a patient's overall well-being. By doing so, Dr. Miller is able to find the root cause of any health challenges and guide patients on the path of natural recovery.

## Creating a HEALTHY BODY

### CIRCULATE, DETOX AND REGENERATION OF CELLS

### STACKING SYNERGISTIC THERAPIES SIMULTANEOUSLY = EXPONENTIAL RESULTS.

The key to exponential healing is combining 2 or more of these modalities simultaneously.

## EXERCISE WITH OXYGEN THERAPY (EWOT)

### Exercise with Oxygen Therapy vs. Hyperbaric Oxygen Therapy

**EWOT** involves breathing high levels of oxygen while exercising. The higher oxygen level in the lungs combined with aerobic exercise pushes O<sub>2</sub> oxygen into every fluid in the body: plasma, interstitial fluid, synovial fluid, and CSF. Thus saturating the body with oxygen!

## MOLECULAR HYDROGEN INHALATION

1. Acts as a powerful Antioxidant
2. Is an anti-inflammatory
3. Reducing the exercise-induced rise in lactic acid
4. Supporting repair and recovery from injury or overtraining
5. Protects against metabolic conditions. Decrease in blood sugar & cholesterol levels.

## BIO-MAT FAR-INFRARED LIGHT WAVES & THE HIGHEST VIBRATIONAL FREQUENCIES INTO THE BODY.

1. The Bio-Mat also produces negative ions, nature's energizer, which deliver a molecular level massage.
2. This accelerates and deepens all healing and cleansing processes.
3. It balances pH by decreasing acidity and is considered the 'master power switch' that activates the body's entire cellular communication system.

## WAVE THERAPY Acoustic pressure wave

Wave Therapy is FDA cleared for circulation and University Study shows the efficacy for vasodilation.

## CRYSTAL FUSION LIGHT THERAPY

Crystal Fusion Light Therapy is not designed to "fix" or "heal" anyone. It's designed to assist in relaxing, balancing, and/or stimulating as needed. It's a fusion of elements that have long established and well-known properties that positively impact us at all levels – mind, body, spiritual/energetic, emotional.

## OZONE THERAPY

Ozone Therapy Stimulates oxygen utilization. Oxygen is our most critical nutrient but it is not what you take in but what you utilize. Decreased Oxygen Utilization causes mitochondria decay, which is the underlying cause of degenerative condition. Ozone is an exceptional mitochondrial stimulant and our research shows it drastically increases heavy metal detoxification through perspiration.

## IONIC FOOTBATH

Scientific research shows that patients who receive an ion foot detox have higher amounts of toxins in their urine and stool within three days of treatment, further demonstrating that the treatment does indeed enhance detoxification. And finally, the Pacific College of Health and Science also quotes a study that demonstrates a significant **reduction in aluminum and arsenic levels** in the patient's blood after ionic cleansing.

## WHOLE BODY VIBRATION

- ♦ Reducing lymph edema
- ♦ Improving circulation to the lymphatic system
- ♦ Removes waste and bacteria from the lymphatic system
- ♦ Increase hormone production

## PEMF

- ♦ Improve energy, circulation, blood and tissue oxygenation, sleep quality, blood pressure and cholesterol levels, the uptake of nutrients, cellular detoxification and the ability to regenerate cells
- ♦ Balance the immune system and stimulate RNA and DNA
- ♦ Accelerate repair of bone and soft tissue
